ORIGINAL

SAFE & VAULT INC.

SAFE DOOR

Constructed of high strength composite materials developed by Original Safe & Vault Inc. With an overall door thickness of 6.75 inches, Original has included yet another proprietary super alloy in the plate surrounding the inner door lining.

SAFE BODY

Constructed of the same high strength composite materials with an overall thickness of 3.5 inches. Original's anti-peel Zee Bar system is fastened to the inner and outer structure of the body.

BOLT WORK

Moving and fixed bolts are a full 1.5 inches in diameter. Receiver cups are welded to the super alloy inner body lining.

DUAL LOCKING

Locking by a Group 2 combination lock with over one million combinations and a high security key lock. The locks are interchangeable. Electronic locks are optional.

LOCKING MECHANISM

Lock mechanism is protected by a random relocking system. A tempered glass trigger will activate the relocking system in the event of an attack.

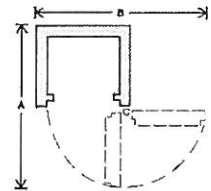

ULTL30

BASTION

Original Safe & Vault Co. reserves the right to alter any specification and make necessary improvements in the interest of providing maximum security. Shelves are removable and adjustable. Right handle door available.

The Bastion UL-TL-30 features: the latest developments in a series of high quality safes. Fire and theft resistant, the safe has advanced design features to protect against conventional tools, hammers, chisels, wedges, drills and explosive attacks. This safe will protect your valuables like no other safe in its class.

Options include right handle door, private interior compartment with key or combination lock, additional shelves and a 144 hour time clock.
