FIRE RESISTANT SAFES

CLASS 350 - 4 HOUR (A)

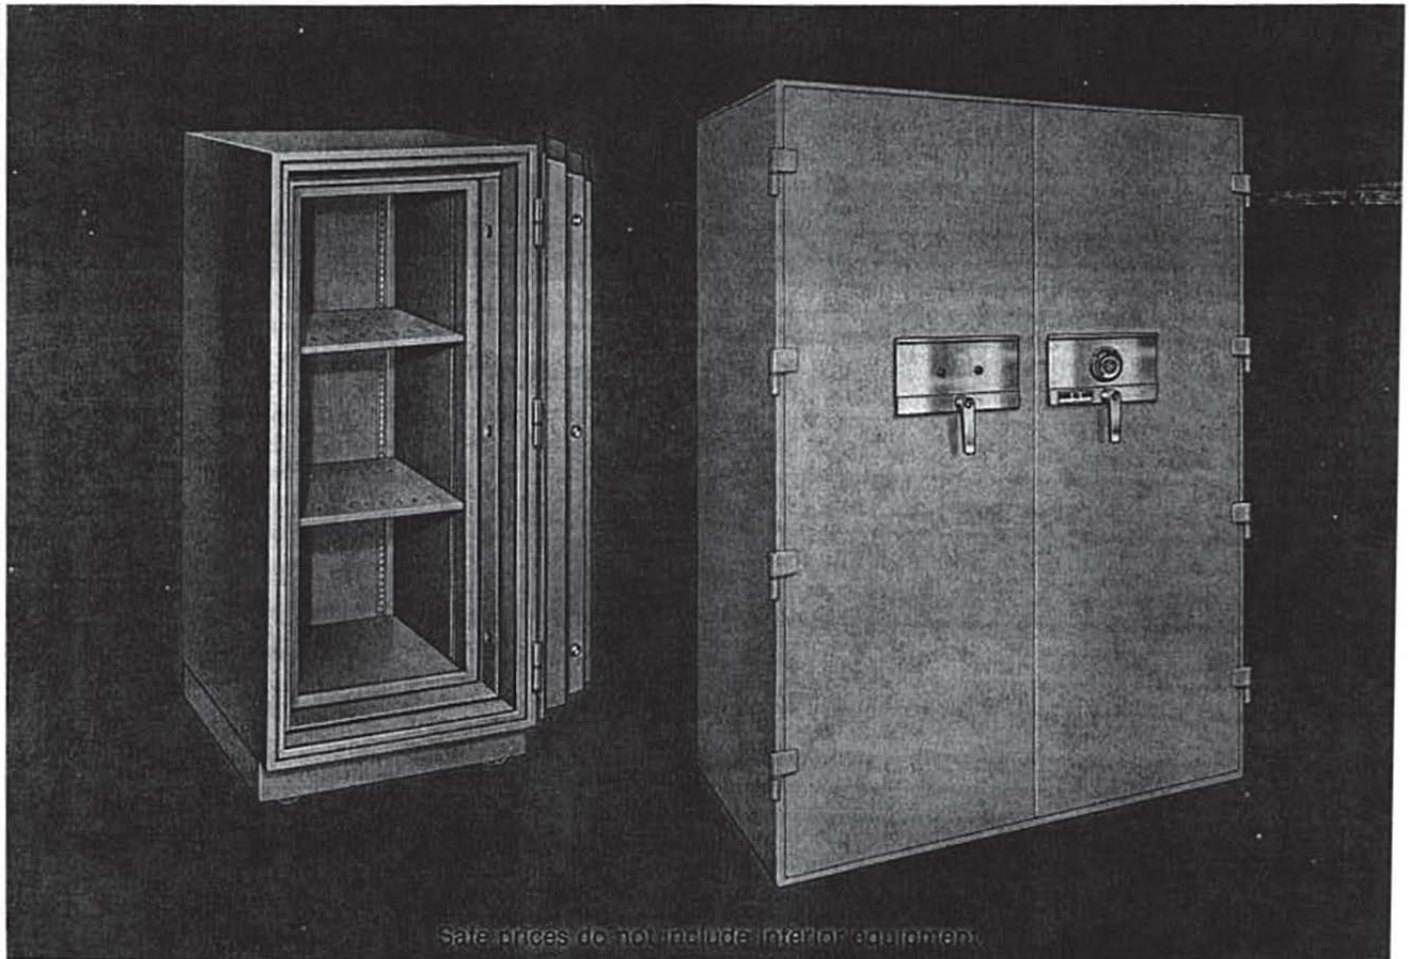

The risk of fire is ever-present, for even in modern building construction, fire takes its terrible toll every day, and the evidence is all too clear that, once its records have been destroyed by a fire, few businesses

are able to reopen! The risk of fire is always with you but you can reduce the hazard with a H.H.M. 4-Hour Safe. Typical of H.H.M.'s ability to reduce your fire risk with modern styling are the safes

shown here. These safes can help you eliminate the worry of fire destroying your records. The labels they display indicate the degree of protection they provide.
