HERRING-HALL-MARVIN *SQUARE DOOR*
# TL-15 SERIES MONEY SAFES

This new Herring-Hall-Marvin safe series combines the tool resistive rating of TL-15 performance plus the convenient accessibility of square door design. The TL-15 rating reflects this safe's resistance to attack as performed by Underwriters' Laboratories using electric drills, hammers and similar equipment. These safes qualify for Mercantile Safe Insurance and Broad Form Insurance Class "ER".

All Herring-Hall-Marvin TL-15 Money Safes use the convenient three-tumbler, key-changing combination locks capable of 1,000,000 combinations; U.L. listed relocking device which deadlocks locking bar when lock spindle is driven from door; lock is protected by concealed, drill resistive steel plate for extra security.

All H-H-M Square Door TL-15 Safes feature a full-height locking bar that utilizes the same principle embodied in massive bank vault doors.

The labels shown below indicate that H-H-M TL-15 Safes meet the standards of the Underwriters' Laboratories.
